LIST OF CONTENTS

VOLUME 42

NUMBER 1

S. Deo, R. Javadpour and **G. M. Knapp**	**1**	Multiple setup PCB assembly planning using genetic algorithms
Y. Zhao, K. Ridgway and **A. M. A. Al-Ahmari**	**17**	Integration of CAD and a cutting tool selection system
M. Omar and **D. K. Smith**	**35**	An optimal batch size for a production system under linearly increasing time-varying demand process
I.-C. Choi and **D.-S. Choi**	**43**	A local search algorithm for jobshop scheduling problems with alternative operations and sequence-dependent setups
A. M. Malyscheff, T. B. Trafalis and **S. Raman**	**59**	From support vector machine learning to the determination of the minimum enclosing zone
M.-S. Han and **D.-J. Park**	**75**	Optimal buffer allocation of serial production lines with quality inspection machines
M. Zhou and **C. Zhao**	**91**	An optimization model and multiple matching heuristics for quality planning in manufacturing systems
T.-C. Kuo, S. H. Huang and **H.-C. Zhang**	**103**	Erratum to "Design for manufacture and design for 'X': concepts, applications, and perspectives"

NUMBERS 2–4

M. I. Dessouky	**105**	The 26th International Conference on Computers & Industrial Engineering
H. Fallah and **E. Shayan**	**107**	Theoretical and experimental analysis of operation lead times based on the IMPOS approach
K.-S. Park and **C.-H. Jun**	**115**	Semiconductor yield models using contagious distributions and their limiting forms
L. R. Khan and **R. A. Sarker**	**127**	An optimal batch size for a JIT manufacturing system
M. Asano and **H. Ohta**	**137**	A heuristic for job shop scheduling to minimize total weighted tardiness
B. P.-C. Yen	**149**	Communication infrastructure in distributed scheduling
G. Li and **F. Ye**	**163**	Scheduling flow shops in the environment of multi-functional machine tools

Y. Lejtman, E. Shayan and **R. Nagarajah** — **169** Design of a suitable production management system for a manufacturing company

M. Yokoyama — **175** Integrated optimization of inventory-distribution systems by random local search and a genetic algorithm

R. Sarker and **C. Newton** — **189** A genetic algorithm for solving economic lot size scheduling problem

W. Xu, Y. Wei and **Y. Fan** — **199** Virtual enterprise and its intelligence management

C. H. Paik, H. G. Kim and **H. S. Cho** — **207** Performance analysis for closed-loop production systems with unreliable machines and random processing times

S. Kayaligil and **S. Ozlu** — **221** Loading of pallets on identical CNC machines with cyclic schedules

M. A. Sobhanallahi, G. R. Jahanshahloo, G. R. Amin and **E. Shayan** — **231** Threshold value for the number of cells in group technology

Y. H. Lee and **M. H. Lee** — **237** A shape-based block layout approach to facility layout problems using hybrid genetic algorithm

H. Hwang, S. Moon and **M. Gen** — **249** An integrated model for the design of end-of-aisle order picking system and the determination of unit load sizes of AGVs

X. M. Ding, J. Y. H. Fuh and **K. S. Lee** — **259** Computer aided EDM electrode design

S. Butdee — **271** Hybrid feature modeling for sport shoe sole design

H. S. Ku, E. Siores, A. Taube and **J. A. R. Ball** — **281** Productivity improvement through the use of industrial microwave technologies

S. H. Masood, V. K. Bagam and **P. Chantanabubpha** — **291** A computerised minimum distance algorithm for machining of sculptured surfaces

Y. Ting, W. I. Lei and **H. C. Jar** — **299** A path planning algorithm for industrial robots

E. Shayan and **L. Al-Hakim** — **309** Beam search for sequencing point operations in flat plate manufacturing

H. Ohta and **M. Nakamura** — **317** Cell formation with reduction in setup times

A. M. Mukattash, M. B. Adil and **K. K. Tahboub** — **329** Heuristic approaches for part assignment in cell formation

E. Thurairajasingam, E. Shayan and **S. Masood** — **343** Modelling of a continuous food pressing process by dimensional analysis

E. P. Chew, C. J. Ong and **K. H. Lim** — **353** Variable period adaptive genetic algorithm

H.-S. Hwang — **361** An improved model for vehicle routing problem with time constraint based on genetic algorithm

S. L. Ho, M. Xie and **T. N. Goh** — **371** A comparative study of neural network and Box-Jenkins ARIMA modeling in time series prediction

F. Guerrero, S. Lozano, K. A. Smith, D. Canca and **T. Kwok** — **377** Manufacturing cell formation using a new self-organizing neural network

Y. Wei, W. Xu, Y. Fan and **H.-T. Tasi** — **383** Artificial neural network based predictive method for flood disaster

R. J. Kuo, L. M. Ho and **C. M. Hu** — **391** Cluster analysis in industrial market segmentation through artificial neural network

Y. Ting, F. M. Shan, W. B. Lu and **C. H. Chen** — **401** Implementation and evaluation of failsafe computer-controlled systems

D. S. Chang and **S.-T. Jiang** — **417** Assessing quality performance based on the on-line sensor measurements using neural networks

G. Q. Huang and **K. L. Mak** — **425** Synchronous quality function deployment (QFD) over world wide web

G. Abdul-Nour, M. Demers and **R. Vaillancourt** — **433** Probabilistic safety assessment and reliability based maintenance policies: application to the emergency diesel generators of a nuclear power plant

L.-C. Tang, A.-P. Tan and **S.-H. Ong** — **439** Planning accelerated life tests with three constant stress levels

S. Nakanishi and **H. Nakayasu** — **447** Reliability design of structural system with cost effectiveness during life cycle

L. Luong, J. He, K. Abhary and **L. Qiu** — **457** A decision support system for cellular manufacturing system design

B. P.-C. Yen — **471** Electronic commerce front-end in apparel supply chain

S.-U. Guan and **Y. Yang** — **481** SAFE: secure agent roaming for e-commerce

T. W. Kim, C. S. Ko and **B. N. Kim** — **495** An agent-based framework for global purchasing and manufacturing in a shoe industry

K. Yeo and **C.-H. Jun** — **507** Teletraffic analysis of cellular communication systems with general mobility based on hyper-Erlang characterization

K. Kurihara and **N. Nishiuchi** — **521** Efficient Monte Carlo simulation method of GERT-type network for project management

M. Kia, E. Shayan and **F. Ghotb** — **533** Investigation of port capacity under a new approach by computer simulation

R. A. Sarker and **M. A. Quaddus** — **541** Modelling a nationwide crop planning problem using a multiple criteria decision making tool

H. Jahan-Shahi, E. Shayan and **S. Masood** — **555** Cost/time estimation in flat plate processing using fuzzy modeling

P. Humphreys, R. McIvor and **G. Huang** — **567** An expert system for evaluating the make or buy decision

N. Moussa, S. E. Moussa and **M. S. Eid** — **587** The Synchronizer, a model for feasibility analysis and financial planning
